

The Academy for Radiology and Biomedical Imaging Research
will host a workshop,
partnering with the National Institute of Standards and Technology, to collectively address
some of the most pressing technological needs within the imaging community.

This is a continuation of the Academy Scientific Symposium held in September 2017.

Wednesday, May 16th and Thursday, May 17th.

[For details and registration click here.](#)

Goal: It is generally accepted that a need exists to develop interoperable data standards that can permit free flow and optimum utilization of medical diagnostic data. The goal for this workshop is to convene domain experts from government, industry and academia to discuss ways and means to develop and implement these standards.

The available workshop space is limited, with participation on a “first-come, first-served” basis. Early registration is encouraged, and the number of participants from a given agency/institution/organization may be limited, if necessary, to enable broad stakeholder attendance. Participation in this innovative initiative and your engagement/support of our efforts is paramount and we expect our collective efforts will lead to advanced innovative technology and sustained collaboration within and beyond the imaging research community. A summary of the workshop outcomes will be publicly posted.

Location: NIST campus located in Gaithersburg, Maryland
Schedule: Wednesday, 9:15 am – 5:30 pm; Thursday, 9:30 am – 12:30 pm
Registration: \$200 per person
Hotel: Hilton Washington DC North/Gaithersburg
Register at: <http://bit.ly/2ogcLcW>
