2019 CEREMONY

Academy Gold Medal

AND DISTINGUISHED INVESTIGATORS

The ACADEMY for Radiology & Biomedical Imaging Research

The Academy will host its annual Gold Medal and Distinguished Investigators Award Ceremony on Tuesday, December 3RD from 3-5PM, E253AB McCormick Place. Ceremony 3-4PM Reception 4-5PM.

3:00 PM	**Welcome Remarks** Renee Cruea, MPA, Executive Director/Academy
3:10 PM	**Gold Medal Presentation** Hedvig Hricak, MD, PhD, President/Academy
3:20 PM	**Gold Medal Recipient** Steven E. Seltzer, MD
3:30 PM	**Welcome Distinguished Investigators** Reed Omary, MD, MS & Elizabeth Krupinski, PhD, Co-Chairs for the Academy Council of Distinguished Investigators
3:40 PM	**Inductions into the Academy Council for Distinguished Investigators**
4:10 - 4:30 PM	**Photo Opportunities**
4:00 - 5:00 PM	**Awardees Reception**

2019 Gold Medalist

Steven E. Seltzer, MD

Steven E. Seltzer, MD, Chair Emeritus, Department of Radiology, Brigham and Women's Hospital

"Few individuals have dedicated as much time and effort to advocacy on behalf of the imaging research community as Dr. Seltzer," said Dr. Hricak. "He has been a supporter of the Academy since its founding and has played an integral role in its activities ever since, serving admirably as president of the Academy from 2009 to 2011 and continues to assiduously support our work. He is now the Academy's first Fellow in Health Care Policy — a position created to allow him to continue his work with the Academy at the highest level. His input is valued beyond words! He has nurtured the Academy, helping it grow in size, scope and importance. On behalf of all our members, I would like to express profound gratitude to him. His vision for what we could accomplish, and his dedication to realizing that vision, have benefited radiological research and patients everywhere."

Dr. Seltzer has also served the Academy as the chair of the Coalition for Imaging and Bio-engineering Research (CIBR) as well as being a member of the Academy Board of Trustees.

Dr. Seltzer was the Chairman of the Department of Radiology at Brigham and Women's Hospital (BWH) and the Philip H. Cook Professor of Radiology at Harvard Medical School from 1997 to 2016. Since then, he has served as Department Chair Emeritus, and devotes his professional time to teaching, mentoring and advocacy. He devotes his personal time to his family, and to a new avocation as a drummer.

"It has been an honor and a privilege to be an advocate for the Academy's mission since its inception, and to have played a role in developing programs to recognize our established Distinguished Investigators as well as our Early Career Investigators."
– Steven E. Seltzer, MD

He earned his baccalaureate and medical degrees from the University of Pennsylvania and did his Radiology Residency at the Peter Bent Brigham Hospital from 1976 to 1980, joining the Brigham faculty immediately afterwards. His clinical interests have been in the field of abdominal imaging, particularly advanced applications of helical CT. His research interests are in the arena of perception and psychophysics, focusing on improving our understanding of how radiologists detect, locate and classify abnormalities on diagnostic images. He has published well over 100 peer-reviewed research manuscripts on these topics. Dr. Seltzer has been involved in projects aimed at improving the quality, safety, productivity and cost-effectiveness of radiology services for more than two decades. As BWH Radiology Department Chair, he helped establish the Center for Evidence-Based Imaging (Ramin Khorasani, founding Director).

Active in many radiological organizations, Dr. Seltzer is a past president of the Association of University Radiologists and was awarded the AUR's Gold Medal in 2004. In addition to serving as president of the Academy for Radiology Research, he served as the president of the Society of Chairs of Academic Radiology Departments from 2010 to 2012. He was awarded the Gold Medal from the Radiological Society of North America in 2015.

Dr. Seltzer and his wife Rochelle live in Brookline, Massachusetts. They have a family of two children, a daughter-in-law and two grandchildren.

Distinguished Investigator Awardees

Ken Arai, PhD

MGH 1811

Kevin Bennett, PhD

MIR Mallinckrodt Institute of Radiology

Francis Blankenberg, MD

Colin Derdeyn, MD

Richard Duszak, MD

John Eisenbrey, PhD

Jefferson
Philadelphia University + Thomas Jefferson University

Fiona Mary Fennessy, MB BCH, PhD

BWH

Katherine Ferrara, PhD

Joel Garbow, PhD

MIR Mallinckrodt Institute of Radiology

Yulin Ge, MD

NYU Langone Health

Daniel Gochberg, PhD

Jan Grimm, MD, PhD
